Urbani Resort Vander brightening by Buzzi & Buzzi design

In the Ljubljana town centre's expressive setting, a classy enlightening engineering design by Buzzi & Buzzi Company – a leading company of Lombardy – "comes to life" is the name of the project.

A brightening design for room's space

Tradition is combined with innovation, and elegance is combined with simplicity. Designing and one-of-a-kind details: for this work, Buzzi & Buzzi company create with light, and create unique and expressive settings thanks to brilliant picturesque designs perfectly embedded with the pure of the Hotel's atmosphere.

The devices selected brought a novel meaning to that environment, reflecting all spaces and giving them to a new motivation. This aimed at appreciating the architectures, giving more features to furniture as well as a new special language for the rooms. The light adds the quality. The light of 5 luminaries were utilized for this project, selected carefully depending on their planned setting.

Tradition is combined with innovation in a lighting design

Inside rooms' space, Buzzi & Buzzi chose Pipedo Open, a wall luminary is able to make a general and welcoming light yet not invasive. The same products are regulated with the same finishing ones on the walls becoming tangible decorative elements: the devices are not hidden, but become a central character, spreading the spaces.

Pipedo Open design made by AirCoral Company, a kind of material patented and developed by Buzzi & Buzzi Company. The design is not only eco-friendly, but has also anti-bacterial anti-polluting properties, and photo catalytic, targeting to improve the life's quality of people standard-living.

Buzzi & Buzzi chose Pipedo Open style

Two different devices of lighting were installed along with corridors, with equal importance but separate tasks: a perfectly hidden recessed luminaire Lentil, possible to make suggestive and so useful bright paths. These products are installed near the entrance; they discreetly express the the suite's access points. AirCoral Company perfectly integrated them inside the walls, which created an unique play of light.

Corridors are brightened up by Sky, ceiling lights that accurately highlight the space's linearity. The AirCoral's pure and silky effect of focuses on the elegant and minimalistic design in the devices that customize spaces and projecting clients to an unique dimension.

Inside the space of bathrooms, light is the protagonist because of Idroround's design. The flush luminaire are able to ensure the right lighting while, simultaneously, stand up to humidity, present in the environments. The Idrorounds are made of Coral Water Out Company. These materials keep water shape from penetrating inside. Thereby, the water-repellent reflection would not be changed over time, as it is not an apparent finishing, but intrinsic features of Coral Water Out®. Even if there is no maintenance, Coral Water Out® builds up water- proof for the other representing features of Coral® –, resistance, long life and beauty.

Alert and minimal, those products enhanced the environment of bathroom, making it familiar and resting. The last but not least, to brighten up the Bar/Restaurant areas, Buzzi & Buzzi brand selected Ecla as a ceiling luminaire helping improving the special false ceiling as well as placing a good and diffused illumination on the whole environment.
