CONTRACT &  
HOSPITALITY

**MILAN | AB: THE LUXURY OF SIMPLICITY | BUZZI & BUZZI**

The architect Alfredo Canelli, together with the architect Giovanni Antonelli of Well Made Factory, opted for the enveloping style of the nineteen twenties for the new restaurant of the chef Alessandro Borghese in Milan. Intense colours, warm, natural materials and plays of geometries that define the cornices of every room and that find perfect correspondence in the lighting design of Buzzi & Buzzi. Starting from the Buzzz and Eggy products, completely retractable housings with hexagonal and ovoid shapes respectively in AirCoral®; they guide the way on the stairs in the large corridor revealing the heart of the new gastronomic reign, that is, the restaurant area. Eggy and Funnel Lamp – a pendant lamp with a peculiar funnel shape, made of white optical AirCoral® – enhance the piano bar, giving way to the X1, Taurus and Pipedino Open in the services area.
