Buzzi & Buzzi, a leading company from Lombardy in the lighting sector, collaborates with Lighting And on the lighting design project for a chalet in Sauze D'Oulx, in Piedmont (Italy). The brand and the Milanese studio take advantage of their professionalism and passion to enhance the interior with light: thus, the luminous solutions by Buzzi & Buzzi, already known in the sector for a high degree of efficiency combined with clean and minimal design, are implemented in a project studied by Lighting And designers.

An exclusive location, set in a mountain landscape and surrounded by snow, welcomes its guests in a cosy atmosphere but at the same time characterized by sharp volumes and contemporary textures. Light becomes essential to emphasize the ensemble of fine wood and elegant coverings and to give an appropriate mood. Buzzi & Buzzi offers accent lighting, aimed at recreating multiple points of light on the ceiling and beams, obtaining a homogeneous and efficient light distribution. The protagonists of the lighting project, therefore, are Genius Naked, the totally disappearing recessed product from the Genius family and the X1 projector.

Numerous Genius Naked, which light up on the ceiling of the chalet, are a variant of Genius that, thanks to the steel body, can be installed on surfaces such as wood, but also glass, iron, concrete, mirrors and industrial modules up to a maximum thickness of 2 cm, thus distinguishing itself from all the other Genius. Naked is in fact particularly versatile, capable of fitting in perfectly and playing with textures and design. The light, that “sinks” into the surface, creates an unexpected yet never invasive accent.

X1, installed on the perimeter of the main hall of the chalet, is an aluminium LED projector with black finish (available also in white) with a diameter of only Ø 30 mm for the emission hole. Suitable for ceiling, wall or rail mounting, it stands out for its high performance, minimal design that ensures minimum visual impact and a 360° adjustable arm that directs the light beam where desired. Single points, details and textures are highlighted thanks to lighting which can design exclusive lighting scenarios that envelop the guest in a lounge situation.

Thanks to the professionalism of Lighting And, the interiors of the chalet are illuminated taking into consideration the specific needs of the project, and the Buzzi & Buzzi products find their perfect application: the lighting dots blend with the wooden surface, giving a cozy yet trendy environment.

Buzzi & Buzzi, synonymous with Made in Italy quality applied to light: in a surprising mix of efficiency and design, the lighting company finds its perfect expression. Chosen by lighting designer or by professionals in the design and planning of interiors and exteriors of a residential and commercial nature, Buzzi & Buzzi confirms itself among the top players in the sector.

Buzzi & Buzzi

Founded in 1990, Buzzi & Buzzi is a company specialised in the creation of indoor and outdoor hidden lighting devices, often designed by renowned designers and architects. The perfect symbiosis of technique and design is the key element of Buzzi & Buzzi products, giving life to innovative lighting concepts, from an aesthetic yet also functional and technological point of view. Nationally and internationally renowned, the company stands out for its profound attention to innovation, for its research of new sustainable materials and for continuously improving the quality of its products and services.
