ITALIAN ARCHITECTURAL LIGHTING SOLUTIONS FROM GINEICO.

Australian brand **Gineico** has been bringing Italian architectural **lighting** solutions to Australian shores since 1976. Beginning with marine lighting fitted to locally-built luxury boats, the brand soon evolved to outfitting luxury waterfront homes. Passionate about Italian-made innovative products, their curated selection marries quality with design. Gineico's brands are leaders in LED lighting solutions, most being smaller artisan manufacturers who are committed to both the latest technology whilst being realistically priced.

"We speak Italian. We know Italian Lighting design and have a unique point of difference in that we also know and understand our harsh waterfront environment," says Gineico.

New and notable products in Gineico range include the Genius collection from **Buzzi & Buzzi**. At just 23mm in diameter, the unique fitting delivers double the power of a standard sized downlight.

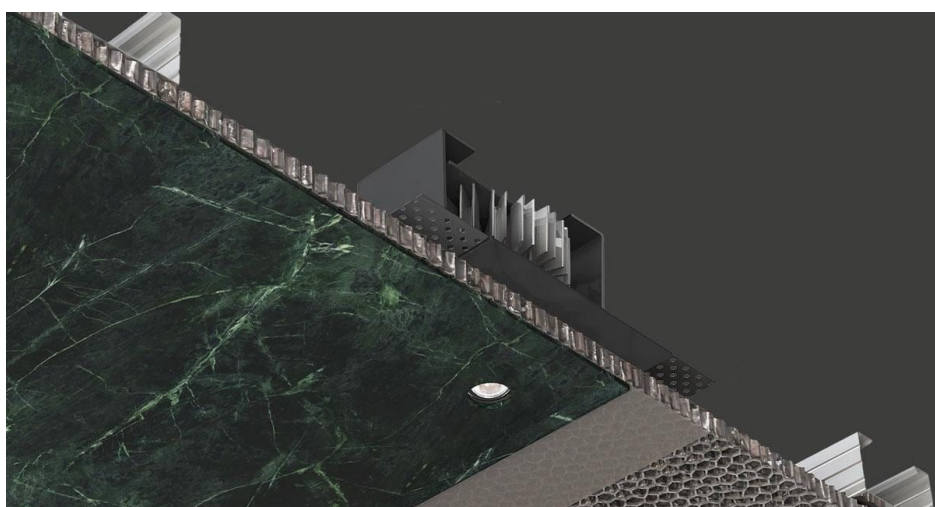

Available in a range of options including waterproof, low recess, directional and a 'naked', designed specifically for timber-lined ceilings. The light is so small and discreet that it essentially disappears on a ceiling.
